Lab Exercises on TUPLE and SET

1. Write a Python program to convert a tuple to a string..

2. Write a Python program to find the repeated items of a tuple

3. Write a Python program to convert a list to a tuple..

4. Write a Python program to reverse a tuple.

5. Write a Python program to remove an empty tuple(s) from a list of tuples

6. Write a Python program to replace middle value of tuples in a list.

7. Write a Python program to get the 5th element and 5th element from last of a tuple.

8. Write a Python program to check if two given sets have no elements in common.

9. Write a Python program to check whether an element exists within a tuple.

10. Write a Python program to check if a given value is present in a set or not.

11. Write a Python program to check if a given set is superset of itself and superset of another given set.

12. Write a Python program to create a union, intersection, difference, symmetric difference of sets.

13. Write a Python program to remove the intersection of a 2nd set from the 1st set.
